

**REMARKS**

The undersigned, a pro-se applicant, respectfully requests that if the Examiner finds patentable subject matter disclosed in this application, but feels that Applicant's present claims are not entirely suitable, the Examiner draft one or more allowable claims for applicant. The applicant only wishes to protect the magnet motor exactly as shown in the drawings of the specification.

This case has been carefully reviewed and analyzed in view of the Official Action dated May 21, 2003.

The Examiner has stated that claims 5-6 are written as dependent claims 3 and the recitations of claims 5-6 appeared to be appropriately dependent claims of claim 4. Claims 4-8 have been canceled to avoid this objection.

Further, the Examiner has rejected claims 1-3 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-3 have been carefully amended to overcome this rejection. However, if the amended claims still do not comply with the requirement, an Examiner's amendment is earnestly solicited.

It is now believed that the subject Patent Application has been placed in condition for examination, and such action is respectfully requested.

Respectfully submitted,

*M. Z. Chen*
